## EXECUTIVE SUMMARY

An assessment of the carbon footprint associated with Active Workplace Group's business activities for the 2023/2024 year was undertaken to identify the environmental impact of their operations and to serve as a planning tool for managing and reducing their carbon emissions.

The carbon footprint report covers the period of 1st June 2023 to 31st May 2024 and includes Scope 1 (direct emissions associated with refrigerants and fleet vehicles), Scope 2 (indirect emissions associated with purchased electricity), and Scope 3 (water use, waste from AWG and clients, business travel, homeworking, commuting, and purchased goods and services, transmission and distribution and WTT) emissions.

Emissions were calculated following the Greenhouse Gas Protocol guidelines (GHG Protocol).

### Approach

The operational control approach was used to calculate emissions. This means we have identified, calculated and reported on emissions based on activities for which the business has operational control. We have measured all relevant Scope 1 (direct emissions), Scope 2 (indirect emissions), and Scope 3 emissions (other indirect emissions)

This year's report will form the baseline for future carbon reporting.

Angela Love, Head of Sustainability

# CARBON REPORTING

## What is a Carbon Footprint

A carbon footprint is the total greenhouse gas (GHG) emissions caused by an individual, event, organization, service, place or product, expressed as carbon dioxide equivalent (CO<sub>2</sub>e). Greenhouse gases, including the carbon-containing gases carbon dioxide and methane, can be emitted through the burning of fossil fuels, land clearance and the production and consumption of food, manufactured goods, materials, wood, roads, buildings, transportation and other services. Anything that creates greenhouse gases can be included in your total carbon footprint.

## Why is it important

Measuring and managing your carbon emissions will enable you to anticipate and timely manage the impact and risks of your business operations and take a progressive leadership position on climate issues. It will also help you to focus on the development of innovative solutions and new opportunities to transition to a low carbon economy.

Below are the highlights from Active's annual report a full breakdown of all categories in all scopes is available in the Appendices.

## DATA COLLECTION

### Scope 1:

- The calculations of Scope 1 emissions were based on the actual volumes of refrigerants.
- Fleet vehicle emissions were calculated using the actual volume of petrol and diesel used.

### Scope 2:

- The calculations of Scope 2 emissions were based on actual usage data. Estimates and extrapolations were made where there were gaps in the data provided.
- All electricity usage was renewable on tariff from Positiv Energy, therefore market-based emissions were 0.

### Scope 3:

- The calculations of Scope 3 emissions associated with purchased goods and services were based on total spend data on chosen categories from Profit and Loss accounts.

- The calculations of water consumption and water waste were based on actual usage data through the provider portal at Castle Water.
- The emissions calculations associated with business travel in employee-owned vehicles were based on employee mileage claims.
- Homeworking and commuting were calculated based on data from an employee survey, using amount of commuting/homeworking days, distance of commute and mode of transport.
- Public transport emissions were extrapolated using spend data and average ticket price per km for the various modes of transport.

## Conversion factors

- Unless stated otherwise, the emission conversion factors used for the calculations were sourced from the Department for Environment, Food & Rural Affairs.
- If a market-based conversion factor for electricity were needed, it would have been sourced from the Association of Issuing Bodies (AIB).
- The conversion factors used for the calculations of emissions associated with purchased goods and services was sourced from the Department for Environment, Food & Rural Affairs (DEFRA).

# REPORT TOTALS

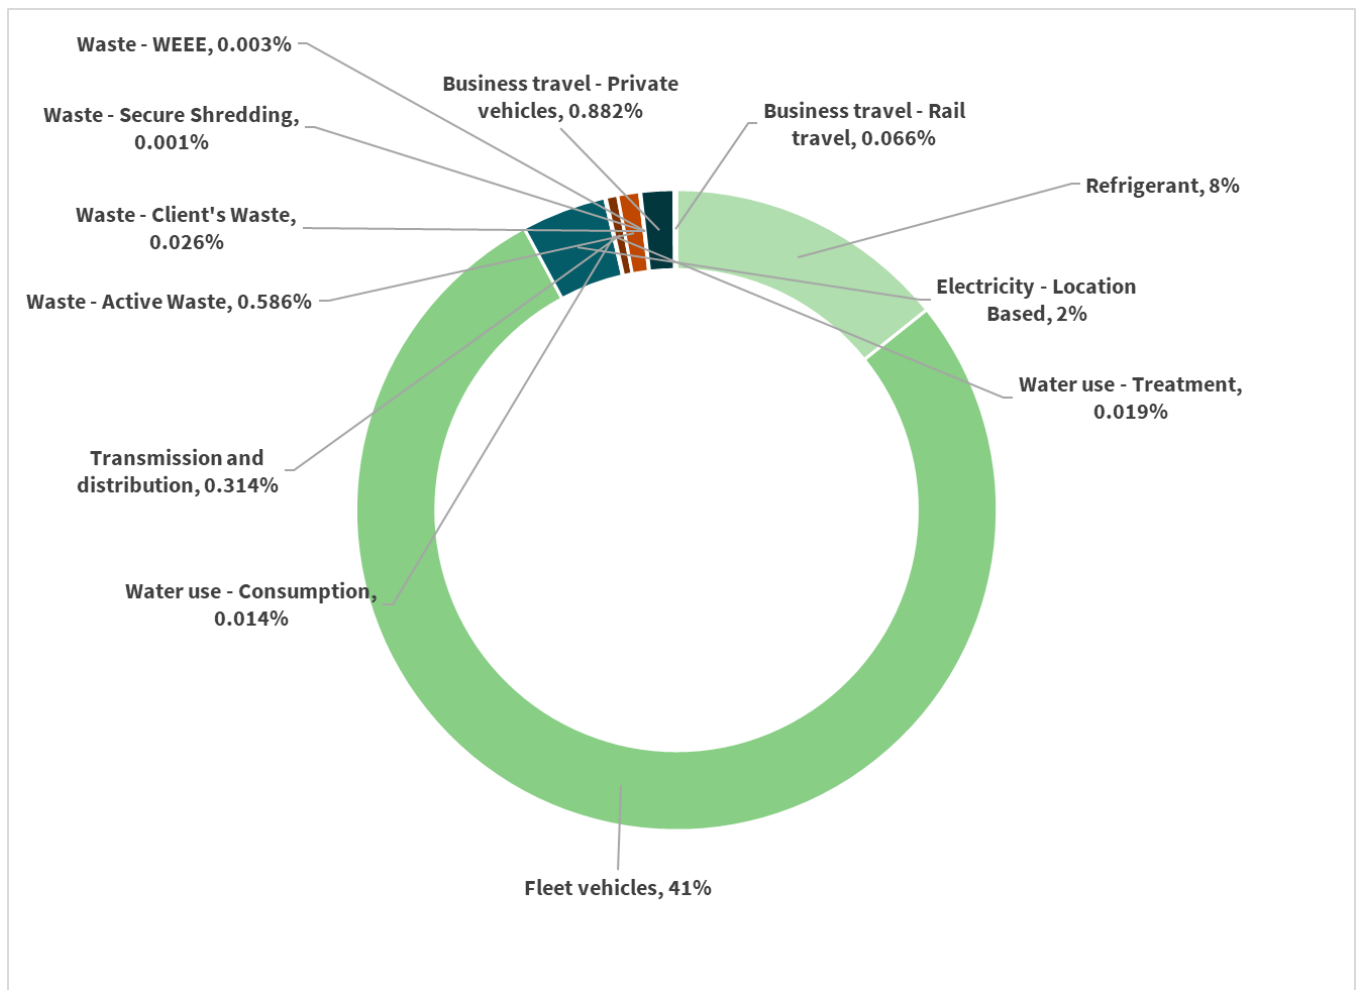

## GHG Emissions Totals by Scope for 2023-24

			From 01/06/2023 - 31/05/2024	
SCOPE	Energy Source	Units	Tonnes CO2e	% of Total Emissions Location based
Scope 1	Refrigerant	kg	18.36	8%
Scope 1	Fleet vehicles	Litres of fuel	25.76	41%
<b>SCOPE 1 TOTAL</b>			<b>44.11</b>	<b>2%</b>
Scope 2 - Location based	Electricity - Location Based	kWh	5.37	2%

	Commuting		48.04
	Purchased goods & services	1902.44	2436.13

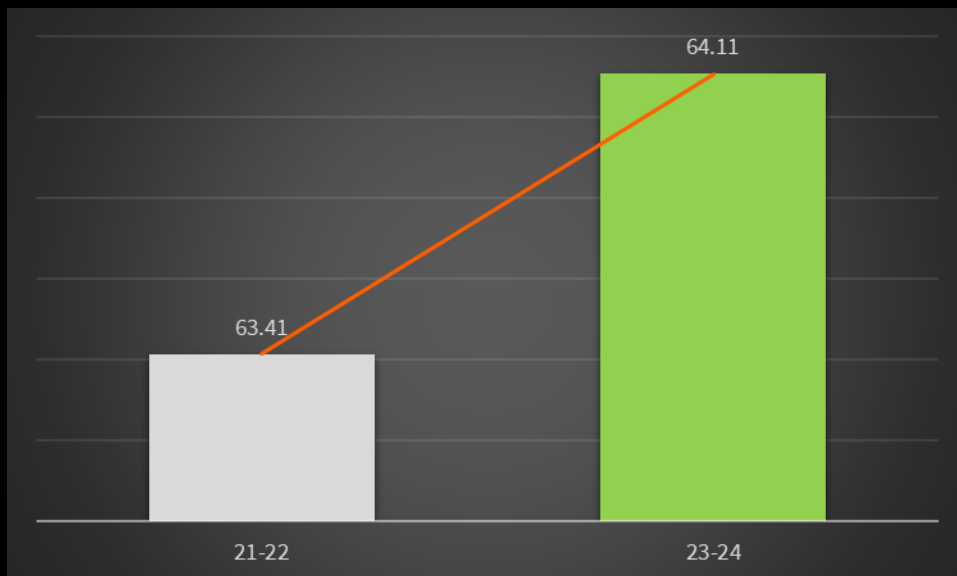

## Total Active Waste

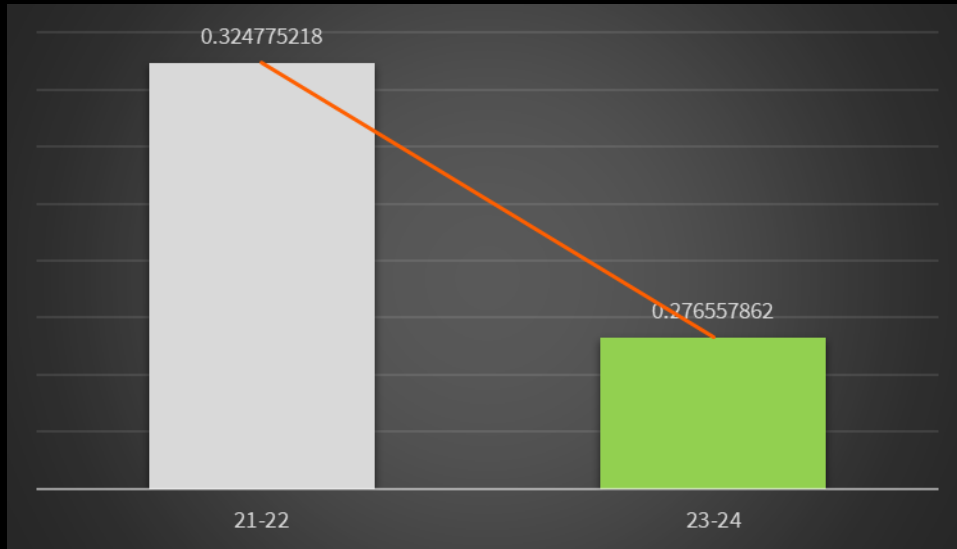

## Electricity Consumption per Employee

## Procurement per Employee

## CO2e KG per Revenue

# CARBON REDUCTION TARGETS

Below are Active Workplace Group’s emission targets for Scope 1,2 & 3 leading up to our Unlocking Potential target of NetZero by 2030. Alongside these are Active’s sustainability targets that are outside GHG reporting – these include our three pillars of sustainability in people, places and partnerships as specified in our Sustainability Strategy – Unlocking Potential. These targets and our performance<sup>1</sup> are reviewed annually after the publication of our GHG Report.

## Scope 1 Emissions Targets

Target 1-1: Reduce Fleet Vehicle Emissions Year on Year.

Target 1-2: Introduce Hybrid Vehicles into fleet for new vehicle purchases.

Reporting Year	Fleet Vehicle Emissions Tonnes Co2e TARGET	Fleet Vehicle Emissions Tonnes Co2e ACTUAL	Hybrid/EV Vehicles in Fleet Target
21-22	N/A	N/A	0
23-24	35	25.757	0
24-25	22	24	2
2030	10	10	5

## Scope 2 Emissions Targets

Target 2-1: Achieve REEB Net Zero Carbon Target<sup>2</sup> for Electricity Intensity by 2030.

Target 2-2: Maintain A Rating for Energy Performance Certification.

Target 2-3: Report below REEB Best Practice Electricity Intensity<sup>3</sup>.

Target 2-4: Report Falling Electricity usage emissions per employee.

Target 2-5: Renewable Energy Use –100% Renewable Tariff

<sup>1</sup> Note our KPI Reporting Base Line Year is set at 23-24.

<sup>2</sup> (70KWh/M2) in 2024-2025

<sup>3</sup> (124KWh/M2) in 2024-25

	ACTUAL 2-2 EPC Rating	TARGET 2-1 / 2-3 Electricity Intensity Kwh/m2	ACTUAL Electricity Intensity Kwh/m2	TARGET Electricity Tonnes CO2e per employee	ACTUAL Electricity Tonnes CO2e per employee
2021-22	B	n/a	123	n/a	5.307/30 0.177
2023-24	A	120	115	0.15	5.373/38 0.141
2024-25	A	110		0.10	
2030	A	70		0.09	

## Scope 3 Emissions Targets

Target 2-1: Reduce Active Waste KG % £Turnover YOY

Target 3-2: Reduce Client Waste KG % £Turnover YOY

Reporting Year	Active Waste KG/Turnover TARGET	Active Waste KG %Turnover ACTUAL	Client Waste KG %Turnover TARGET	Client Waste KG/Turnover ACTUAL
21-22	n/a	n/a	n/a	n/a
23-24	n/a	.308%	n/a	3.3%
24-25	.28%		3.1%	
2030	.17%		2.2%	

Target 3-3: Commit all 3<sup>rd</sup> Parties to Sustainable Suppliers Programme

Reporting Year	Supply Chain Onboarded TARGET	Supply Chain Onboarded ACTUAL
21-22	n/a	0
23-24	90%	87%
24-25	95%	
2030	100%	

Target 3-4: Reduce Total Scope 3 Emissions Tonnes CO2e per Revenue

21-22	n/a	0.325
23-24	0.290	0.277
24-25	0.250	
2030	0.15	

# ADDITIONAL SUSTAINABILITY TARGETS

## Health, Safety and Wellbeing

Ensure that all employees and suppliers feel that their health, safety and wellbeing is prioritised and supported.

TARGET: All new employees must be onboarded with Health & Safety training as necessary to perform their duties. Retraining and updated training to be completed when required.

TARGET: Health and Safety Officer (HSO) to oversee the delivery of every project and report to the construction team. Weekly audits to ensure smooth site operations.

TARGET: • Detailed RAMS (Risk Assessment & Method Statements) to be applied to every client-side project.

TARGET: All external suppliers working on client site are obliged to demonstrate an appropriate Health & Safety policy as a mandatory part of onboarding.

TARGET: Mental Health First Aiders to be available for confidential support and assistance. No employees should have to approach a line manager to seek such support.

### 2023-24 RESULTS – Appendix Training Matrix

## Diversity & Inclusion

Ensure that Active Workplace Group provides an inclusive workplace for all employees.

TARGET: HR outsourcing tasked with removing bias from recruitment processes. •

TARGET: Diversity, Equality and Inclusion policy to form part of all Active onboarding agreements for both employees and suppliers.

TARGET: Maintain female representation greater than a third of all employees and towards parity by 2030.

### 2023-24 RESULTS

2024 figures for female representation 41.7% - Appendix Organogram

## Careers & Development

TARGET: Enable all employees to develop skills and embed sustainability into their roles and responsibilities.

TARGET: Develop a structured apprenticeship and internship programme to improve access to the profession.

### 2023-24 RESULTS

- Active has now a dedicated resource for Sustainability in-house.
- Human Focus Training for Environmental Awareness in Offices completed by Sustainability Team Administrator.
- Four new apprenticeships appointed from local area.
- Two apprentices completed course and appointed into permanent roles.
- One apprentice completed course and now pursuing alternative career.
- Additional training provided for employees including courses on: Health & Safety, AI use & sustainable design
- Investors in People achieved a Silver Award in recent assessment.

## Community Relations & Social Impact

Continue to develop a social impact strategy that has a positive impact on local communities

### 2023-24 RESULTS

- Free storage facilities for ChemoBags Charity in warehouse continues.
- Monthly donations to Woodley Foodbank.
- Active has donated recycled furniture, printers and other electronic equipment to local charities in need including Business2Schools.
- Active mandates 2 days a year for employees to donate their time to a local charity or sustainable initiative of their choice
- AS-5: Business Ethics & Transparency
- Silver Award for Corporate Social Responsibility at the London Chamber of Commerce SME Business Awards
